CAREER SUMMARY

Seasoned Web developer with years of experience designing, developing, and managing websites. Expert in project management, and team leadership. Known for delivering high-quality, scalable web solutions on time and within budget, while fostering a collaborative and innovative team environment.

WORK EXPERIENCE

Lead WordPress Developer: Valon Consulting Group, Texas, USA

- Guide, mentor, and supervise a team of WordPress developers, ensuring high performance and continuous improvement through regular code reviews and fostering a collaborative environment.
- Oversee project planning, define project scope, manage stakeholder expectations, and allocate resources effectively to ensure timely and within-budget project delivery.
- Develop and optimize websites for performance and security, and troubleshoot technical issues promptly.
- Stay updated with the latest WordPress trends and best practices, continuously improve development processes, and encourage the adoption of new technologies within the team.

CMS Developer: Hawkish Group UK

- Registered web domain names and organized the hosting of websites. Providing training on WordPress and offering technical support to the team and customers.
- Designed clean, simple platforms that are easy to understand, support, and extend. Maintaining and implementing new features and pages for websites.
- Ensured and maintained brand consistency across all web development work. Writing clean well- documented custom code.
- Helped organizations manage their websites by overseeing the functionality of the website, evaluating and managing the website's performance.
- Facilitated hosting and server management. I also developed, maintained, and updated website content.

Project Officer/ Website Manager: Missions 1

- Improved the organization's one-page website by designing 12 new website pages. Giving the site a new look and improving the User Interface design.
- The organization's website ranks number 1 on Google search after I worked on the site's SEO, I measured the site's traffic and trends using tools or plugins like Google Analytics, Google Search Console, All in one SEO, Monster Insights, etc.
- Created the organization's digital marketing campaign plan, set up a MailChimp account for sending emails to partners (email marketing), and monitored social media trends.
- Coordinated and managed more than five projects for the organization, directly impacting people from parts of Nigeria. I worked closely with the management to review and implement projects.

Junior JavaScript Developer: Stash Fintech Limited

- Worked on the documentation of the Stashbox savings app using Postman. Testing and modifying some of the system routes and controllers.
- Used customers' information to fetch information from the database. Managing the exchange of data between servers and users.
- Carried out tasks given to me and provided support for the senior developer when necessary.
